Explanation:

The subject matters of claims 1, 10 and 11 do not appear to involve an inventive step in view of the descriptions in documents 1-8, 9 and 10. The specific active substances described in the specification as defined in claims 1, 10 and 11 were well known prior to the priority date claimed in the present application, as described in documents 9 and 10. Applying the system of active substances shown in documents 9 and 10 to the batteries described in documents 1-8, which are secondary battery systems using non-aqueous electrolytes similar to them, would not be difficult for a person skilled in the art, and it is not considered that satisfying the particulars in the present application could produce a significant effect.
